

2026 NEW COLLECTION

Developed for performance-driven environments,
our 2026 collection embodies traceable materials,
precision joinery, and scalable production expertise.

A MANUFACTURING LEGACY SINCE 1993

Established in 1993, Hiep Long Fine Furniture has grown into one of Vietnam's most respected teak and hardwood manufacturers, rooted in craftsmanship and driven by refinement. From our 40,000 m² facility in Binh Duong Province, supported by more than 450 skilled artisans and specialists, we create enduring furniture collections exported across North and South America, Europe, Japan, and Korea.

We work with high-oil South American teak and carefully selected European and North American hardwoods, honoring the natural character of each material while engineering for structural integrity and long-term performance. With a capacity of 40 high-cube containers per month, we combine scale with precision—bringing thoughtful design, responsible sourcing, and quiet luxury to global living environments.

Together, we move forward—engineering the future of fine teak furniture with integrity and vision.

The Character of Teak

Teak is distinguished by its high natural oil and silica content, embedded deep within the tight grain of the wood. When properly kiln dried and moisture-controlled, teak maintains dimensional stability and resists deterioration caused by humidity, temperature fluctuations, insects, and environmental stress.

Not all teak performs equally. The heartwood contains the highest concentration of natural oil, delivering superior durability compared to outer sapwood layers. Responsible selection and grading are essential to long-term product performance.

Teak remains the benchmark material for demanding outdoor and marine-grade applications worldwide.

Refined Teak Wood for Outdoors.
